For: **RF Active Compositions for Use in Adhesion, Bonding and Coating**  
Inventors: **Ryan et al.**  
Our Ref: 2113.0040004/RWE/ALS

Sir:

Transmitted herewith for appropriate action are the following documents:

1. Eighth Supplemental Information Disclosure Statement;
2. Form PTO-1449 (2 sheets) and accompanying (4) references; and
3. Return postcard.

It is respectfully requested that the attached postcard be stamped with the date of filing of these documents, and that it be returned to our courier. In the event that extensions of time are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned.

**Eighth Supplemental Information Disclosure Statement**

Commissioner for Patents  
PO Box 1450  
Alexandria, VA 22313-1450  
Sir:

Listed on accompanying Form PTO-1449 are documents that may be considered material to the examination of this application, in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.56, 1.97 and 1.98. A copy of each document is provided.

This Information Disclosure Statement is being filed as five submissions on the same day. Four submissions are electronic and one submission is non-electronic. This Information Disclosure Statement is being filed more than three months after the U.S. filing date and after the mailing date of the first Office Action on the merits, but before the mailing date of a Final Rejection, or Notice of Allowance, or an action that otherwise closes prosecution in the application. It is believed that only one fee under 37 C.F.R. §1.17(p) is required to cover all submissions. That fee is included with the first electronic submission.

The numbering on this Eighth Supplemental Information Disclosure Statement is a continuation of the numbering in Applicants' Third Supplemental Information Disclosure Statement filed on April 5, 2002, in connection with the above-captioned application.

The Examiner's attention is directed to the following co-pending unpublished U.S. Patent Application, which is directed to related technical subject matter: unpublished U.S. Patent Application No. 10/607,535, filed June 27, 2003 and submitted

Ryan *et al.*  
Appl. No. 09/667,720

herewith as document AR9. The identification of this U.S. Patent Application is not to be construed as a waiver of secrecy as to this application now or upon issuance of the present application as a patent. The Examiner is respectfully requested to consider the cited application and the art cited therein during examination.

Where the publication date of a listed document does not provide a month of publication, the year of publication of the listed document is sufficiently earlier than the effective U.S. filing date and any foreign priority date so that the month of publication is not in issue. Applicants have listed publication dates on the attached PTO-1449 based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

It is respectfully requested that the Examiner initial and return a copy of the enclosed PTO-1449, and indicate in the official file wrapper of this patent application that the documents have been considered.
